

Akshat Gupta

Technical Manager

My journey includes exploring the world of tech from a technical, marketing and managerial perspective. With over 3 years of industry experience in Software Development, I have led and managed teams consisting of more than 30 people globally. A well-rounded business mindset with a technical touch helps me make reasonable decisions and stand out amongst my peers.

WORK EXPERIENCE

Operations and Project Manager

LegalForce RAPC Worldwide

07/2021 - Present

Tasks:

Working as an all-rounded manager for two ventures under the firm- Trademarkia and Nearcast, I was able to balance both corporate and startup work-styles as Trademarkia is an established company running from more than 12 years whereas Nearcast is a startup we had to bring up from scratch.

I helped them create their own in-house engineering teams as the tech team was outsourced before. This included understanding business logic, the tech stack used and hire a team to maintain legacy code and relaying the same to new developers who parallelly revamped the applications into modern tech stacks.

I also helped set up the engineering office in Chennai and handled the finances and operations for the Indian entity.

Setting deadlines, tracking progress, motivating developers & designers, striving towards a product-market fit and coordinating with VCs and Advisors is something I did on a daily basis.

Whenever there was a deadline, I did not hesitate to contribute to the Flutter app and React web teams. I ensured code quality was upto production standards.

Contact: Raj Abhyanker - +1 (408) 398-3126

Developer Evangelist Intern

Agora

07/2020 - 11/2021

Tasks:

I started my journey with Agora by winning a hackathon sponsored by Agora. I started exploring the Agora SDKs and joined the Superstars program. I continued as a member of the program for over a year and mastered the Web SDKs for both RTC and RTM. I was then promoted to the role of a Developer Evangelist Intern in January 2021 under the DevRel team.

In this journey, I was able to help thousands of developers by making Open-Source projects demo-ing how the Web SDK works and how the most daunting tasks could be solved with few lines of code.

Along with a colleague, I conducted workshops teaching Web Development in universities like Columbia, Penn State, NYU, Harvard, UCSC and CalTech, helping participants learn how they could make a functional video calling websites.

TECHNICAL SKILLS

Web Development

Cloud Computing

SEO/SEM

Digital Marketing

Management

WordPress

MANAGERIAL SKILLS

Public Speaking

Leadership

Teamwork

Operations

Finance Management

Adaptability

Strategising

I managed the web support channels on Slack as well as Stack Overflow to ensure developers could utilise the fullest potential of the Agora SDKs.

Lastly, I also wrote technical blogs to serve as guides for priority features and examples which would be helpful to developers.
